## KISS 4-Pin Cable System

Now available with all rebreather purchases!

Shearwater Research has been working closely with KISS Rebreathers to develop this new cable system, for use with Shearwater Petrel and NERD diving system's.

The KISS 4-pin system is both robust, and reliable. This makes it a great alternative to fully hardwiring your components or using the Fischer system.

This system will only be available through KISS; please contact your nearest KISS dealer, or email us directly for more information.

**KISS 4-pin cable, \$ 250.00**

**KISS 4-pin Shearwater Petrel, \$ 1,895.00**

**KISS 4-pin Shearwater NERD, \$ 2,800.00**

**KISS 4-pin strain relief set (1 required per system), \$ 55.00**

Existing hardwired Shearwater Petrel computers may be modified to use this cable.

**Shearwater Petrel - hardwire conversion to KISS 4-pin system - Please contact us for the current price**
